 [Md Ashik Mia](#)

 [Akash Mahmud Ashik](#)

## SKILLS

### FrontEnd :

- ❖ TypeScript, React JS, Next JS, TenStack Query, Redux Toolkit, ShedCn, Token Management, Framer Motion,

### BackEnd:

- ❖ Node Js, Express Js, Nest Js, Socket.io, MongoDB, MySql, Payment System (stripe, paypal, etc), Authentication,

### Others:

- ❖ Python (Basic), Php (Basic), Java (Basic), C, Basic Generative AI, Machine Learning,

## EXPERIENCE

### ❖ MERN Developer | JoinVenture AI (Working)

I have been working there as a MERN Developer for over year. Sometimes I have to code for frontend, and sometimes backend, but most of the time my role was to develop the frontend part there. **Client Handling** is also my part, like **talking with international clients, understanding** their requirements and working accordingly.

### ❖ Data Entry Operation and Analyst | intelligent image management limited | 2021 Jun- 2024 Nov

I worked there as a senior data entry operator for 3 years. My work was to understand details from American documents like mortgage, deed, warranty deed etc and simply entry to the software named calico.

## PROJECTS

### ❖ [Wahejan](#)

**Technologies :** Next JS, Generative AI, Websocket, Axios, Next Auth.

[Live Link](#) [Github Repo](#)

It's platform and sas project, from here companies get AI services for their social media. basically meta based social media like whatsapp, facebook and instagram

### ❖ [MediCare+](#)

**Technologies :** Nextjs, Axios, Open Ai, Typescript, Mongoose, MongoDB, Express Js, Etc

[Live Link](#) *FrontEnd* [Github Repo](#) *BackEnd* [Github Repo](#)

It's a health care platform for patients and doctors both they can create an account and get service or give service. Also for doctors there were integrated ai assistants customly using rag methodology for generative ai and so on.

### ❖ [anaespanafisioterapia](#)

**Technologies :** Nextjs, Axios,

[Live Link](#) [Github Repo](#)

It's a website for clinics where users can see things related to that clinic and get messages and contact the clinic physiotherapist.

#### ❖ [Edu Loop](#)

**Technologies : Nextjs , Axios,**  
[Live Link](#)   [Github Repo](#)

It's a platform for students to give quizzes on the website. I have developed the custom dynamic component and screens and the admin dashboard for admin from where users can post a question. And students will give exams on those questions.  
Technologies: Reactjs, Tenstack Query , Etc

#### ❖ [BP Liberia](#)

**Technologies : ReactJs , Axios,TenStack Query, Etc**  
[Live Link](#)   [Github Repo](#)

It's a platform where users can hear songs, see videos and get market place facilities.

*All of the project codes are available in my github. You can check my github anytime.  
There are other projects also there you can check them out .*
